A Personal Note to Our Friends

WE realize that your business and your profits depend upon the quality of the products you offer to your customers. Likewise, our business, profits, and permanence depend upon the quality of seed we sell and the success you have with it. In the following pages we list only varieties and strains of the best grade of recleaned, tested, true to name seed, grown by the most reputable growers. To you who have purchased from us in the past we wish to express our sincere thanks and appreciation and look forward to your future orders.

We expect to adhere throughout the summer to the prices quoted herein unless causes beyond our control require a change, in which case we shall be governed by the market. All goods are offered subject to prior sale.

Payments. All accounts are net 30 days, or 2 per cent discount if check is received in 10 days from date of invoice. Interest will be charged on overdue accounts.

Cash Discounts. When your remittance is enclosed with order, cash discount of 5 per cent is allowed on all orders for flower seeds.

Postage. We pay postage on all orders for flowers seeds.

C. O. D. We prefer not to send goods C. O. D., but when wanted in that manner, 25 per cent of amount of order must accompany it.

PERISHABLE STOCK. Plants, Bulbs, etc., are POSITIVELY not sent C. O. D.

Routing. On each order please give name of railroad you wish shipped by; there is no other surer way of correct routing. DO NOT use the words send, ship or forward—they mean nothing. State distinctly: Mail, Express or Freight.

IMPOSSIBLE TO GUARANTEE CROPS

Warranty. Although we try our best to please you cannot warrant in any way, expressed or implied, the contents or description, purity, productiveness or any matter of any seeds, bulbs or plants and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on the above terms no sale is made thereof and goods must be returned at once. Again we say for the business you have sent us we are grateful and trust we may continue to serve you carefully and promptly.

In sowing Snapdragons Seed always bear in mind that failure in germination usually results either from covering the seeds too thickly with soil or allowing the flats to dry out while germination is under way, or not applying sufficient shade up to time the seedlings appear. For winter crop the seed should be sown in June and precaution should be taken to prevent damping off. Experimental tests have shown that on an average the most profitable spacing on an early crop is 8x8 inches. The closer the planting the smaller number of stems per plant and the shorter the stems. On a farther planting the cut per square foot is considerably less and the stems only a small percentage longer. Spring plantings, however, can be spaced closer. Grow in temperature about 45 to 48 degrees at night, 60 degrees during the day.

BROWALLIA

Fine winter and spring pot plants. Nice also in beds and borders with some shade.

Browallia speciosa major. Color brilliant ultramarine blue, suitable for pot plant, bedding and border work. For outdoor work, seeds should be sown in February, or later shifted in pots, and planted out in May. Plants will bloom all summer. Tr. pkt.	\$0.35
Elatia. Amethyst blue, height 18 in. Tr. pkt., 20c; $\frac{1}{4}$ oz.35

CALENDULA

Calendula are easily grown in a cool house with plenty of air. In fall, leave the ventilators wide open at all times if possible. A midwinter temperature of 45 degrees at night is best. If grown cool in a good soil you will get good hardy plants. The reason flowering plants sometimes come single is due to check in growth, such as poor soil, lack of water, or weakened through aphids. Sow seed first week in August for end of December or January crop. One ounce will produce about 2500 plants.

ANNUAL LARKSPUR

An Important Cut Flower Crop for Both Indoors and Outdoors

This beautiful hardy annual has been greatly improved in recent years with a wealth of new colors—longer flowering spikes and full double florets. We are listing the best and most up-to-date varieties.

Annual Larkspur is half hardy. In our latitude an outdoor fall sowing usually winters over when well started. The first outdoor planting should be followed by another sown as early as possible in the spring. Larkspur seed germinates poorly in a high summer temperature, and we do not recommend sowing during July and August.

TALL BRANCHING DOUBLE STOCK FLOWERED, 4 Feet

The tall double stock-flowered are best suited for outdoor planting. Seed sown latter part of September usually winters over well in our latitude.

SELECTED PETUNIAS

Good Petunias are becoming more in demand each year, the medium and dwarf varieties for bedding, and the Fringed and Double as a pot plant for Mother's Day Sales.

To grow good Petunias you must have rich soil. Before sowing the seed we recommend treating the soil with hot water to kill all fungi and weed seed in the soil.

Our Petunia seeds are of the finest quality, grown by the best growers in Europe and California, from selected plants, and are hand pollinated; no matter how careful the selection, you sometimes will find a few plants which revert to the old type; these usually bloom first. This is a natural habit of Petunias.

All-Double Dwarf "Victorious" Strain

These plants are remarkably uniform in habit, producing a wonderful assortment of brilliant and fancy colorings. They produce very large, fully doubled flowers. As they seldom grow more than 10 inches in height, they are very suitable for pot plant sales.

Amaranth Red. A strong outstanding red.

Apple Blossom (Daintiness). Light rose-pink.

Blue Brocade. A new dwarf All-Double, true violet-blue, stocky growth, good bloomer.

Gaiety. Rose-red and white with beautifully frilled petals.

Loveliness Fringed. Clear pink. Very double compact habit.

Orchid Beauty. Color orchid or light lilac, heavily veined deeper lilac or violet.

Purple. Dark velvety purple.

Rose-Carmine (World Beauty Pink Perfection). Fringed bright carmine flowers.

Pure White. A companion to Loveliness. This is one of the best double fringed white Petunias.

All-Double Dwarf Giant Fringed Mixed (Victorious). The flowers are very large, exquisitely ruffled and fringed.

Price on the All-Double varieties: $\frac{1}{2}$ Tr. pkt. (500 seeds), \$1.25; 1 Tr. pkt. (1000 seeds), \$2.00; 3 Tr. pkts., \$5.00.

Dwarf California Giants

Dwarf Giants of California

Supreme Florist Strain

A dwarf sturdy growing type especially suited to pot culture. Flowers are beautifully ruffled and fringed with open well marked throats. This dwarf class makes particularly fine 3 and 4-inch pot plants for spring business. Seed for this purpose should be sown in January.

ZINNIAS

Giant Crested Howard Zinnia

Howard & Smith Giant Crested Zinnia. The following is the originator's description: They are the result of direct reciprocal crosses between the small-flowered Scabiosa flowered class and those of the Giant Dahlia flowered section. The blossoms average from 4 to 5 inches in diameter, with a full rounded cushiony center surrounded by broad guard petals after the style of a Pyrethrurn Roseum.

The colors included in the strain are charmingly bright and fresh, and contain almost all known colors and shades of color to be found in this most popular of annual plants. Magnificent shades of orange, orange-scarlet, yellow, rose, and crimson predominate.

Temperature For Forcing Gladiolus

The best temperature is carnation house temperature (50 to 52 degrees Fahrenheit). Cooler temperatures to start with are satisfactory, as the Gladiolus starts slowly and will not take kindly to any increase in heat.
